

The City of Seattle received 28 responses to the Broadband Initiative Request for Interest. Please see the below list.

The City anticipates conducting a two step process for identifying potential partner(s) for a FTTP Network. In Step 1, the City will evaluate the written responses. It is estimated Respondents will be informed of the results by Friday, August 18, 2006. In the event the City decides to proceed to Step 2, the Finalists may be invited to present more detailed information and begin discussions or negotiations with the City. The City may also issue a Request for Proposal to find a partner(s) or may choose to take no further action.
